

ALLEGION

# K-12 consulting services

Allegion consultants are experts in door hardware and security solutions. You are an expert in your field. Let us help create a bridge to connect you to the solutions you need at no charge. We will add value to your project, without adding to your budget.

We work with industry partners and leaders, government officials, fire marshals, educators, parents, and others to bring you a balanced approach to school security that meets the needs of your students, staff and parents.

Our team of consultants have expertise that goes far beyond security products to complete opening specifications, codes and compliance, and best practices for securing the unique openings found in K-12 schools.

## Our services

### School assessments/site surveys

We can assess existing school buildings for compliance with current safety codes, building codes, ADA, and lockdown capabilities and make suggestions for improving school security.

### Access control coordination

We work with your district to align existing technologies with our open architecture solution to control access and provide electronic lockdown capabilities. We make recommendations for platforms, coordinate EAC, prepare presentations and cost analyses to gain alignment, provide case studies, implement pilot programs, and more.

### Key management

We can assist with layered security approach to key control, combining standard open security with restricted solutions to provide you total control of your facility.

### Classroom security

There are a variety of security options for code compliant classroom lockdown. From best practice lock functions to visual indicators, we can help you identify the best solution for your school and budget.

### Product standardization

We can help you standardize on solutions and products across your district to streamline costs and drive consistency throughout your buildings.

### Healthy environments

Allegion is dedicated to promoting health and well-being through industry best practices and innovative door opening solutions. Openings in healthy environments contain a variety of features including physical security solutions, electronic access control, sustainable products, and hardware for hands-free or touchless applications.

### New construction/renovation projects

Create specifications and hardware schedules for new construction and renovation projects, including pre-installation site visits to train personnel on product installation, maintenance and use and post-installation site visits to ensure all products are installed properly, will pass inspection and are in good working condition.

### Overtur™

Our proprietary platform is a centralized hub of door opening information for seamless communication and visibility throughout construction projects and beyond. Overtur can be used for surveying existing sites, specifying modernization and new construction projects, post construction punch walks, collaboration with team members, and more.

We want to provide you with our complimentary consulting services to help you achieve a safer school, while saving you time and money. For more information, contact

**Allegion partners with PASS (Partner Alliance for Safer Schools)**

PASS provides school administrators, school boards, and public safety and security professionals with guidelines and tools for implementing an effective and appropriate approach to enhancing the safety and security through a layered and tiered approach.
