**PRODUCT DESCRIPTION:** The Schlage ALX Series is a grade 2 lock unlike any other. Designed to exceed expectations, it features a single, patent pending chassis design that supports most functions and all cylinder applications. As a modular lock, ALX Series enables in-field function set up or exchange plus a field-selectable Vandlgard feature on all locking functions. Exceptional durability comes from a stainless steel latchbolt, deep-drawn spindles with 5 points of lever engagement and the use of Grade 1 compression springs that prevent droop and wobble. Perfectly suited to the ND Series grade 1 locks, ALX allows you to seamlessly suite between the two to gain grade 1 strength, security and functionality when and where you need it right alongside ALX as a budget saving grade 2 solution elsewhere in the building.

## Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: [www.hpdc-collaborative.org/hpd-2-3-standard](http://www.hpdc-collaborative.org/hpd-2-3-standard)
